INDEX TO VOLUME XXXIII.*

A

Academy, National, Washington meeting, 432.
Acoustical investigations, 238.
Agassiz Associations, Magazine of, 246.
Agriculture, Storer, 509.
Air, coefficient of viscosity of, 308.
Alling, A. N., topaz from Utah, 146.
American Mus. Nat. Hist., Bulletin of, 83, 423.
American Naturalist, 246, 326.
Argentine Star Catalogue, 84.
Association, American, 432.
Astronomical Journal, Gould's, 428.
Atmosphere of β Lyræ, *Sherman* 126.

B

Baillon, Dictionnaire de Botanique, 244.
Ball, J., Notes of a Naturalist in S. America, 426.
Barker, G. F., chemical abstracts, 67, 148, 236, 303, 419.
Barus, C., viscosity of steel and its relations to temper, 20.
Beccari, O., Malesia, 82, 319.
Becker, G. F., texture of massive rocks, 50; Washoe rocks, 75; natural solutions of cinnabar, gold, and associated sulphides, 199.
Bell, L., absolute wave-length of light, 167.
Berkshire Historical and Scientific Society, Papers of, 85.
Böhm, A., Hochseen der Ostalpen, 431.
BOTANICAL WORKS NOTICED—
Acta Horti Petropolitani, 83.
Bentham's British Flora, Hooker, 319.
Bulletin of Congress of Botany and Horticulture, St. Petersburg, 80.
Bulletin de la Soc. Bot. de France, 427.
Catalogus Bibliothecæ Horti Imperialis Botanici Petropolitani, Herder, 83.
Check-list of N. A. Plants, Patterson, 244.
Dictionnaire de Botanique, Baillon, 244.
Flora Brasiliensis, 318.
Icones Plantarum, Hooker, 163, 244, 318.
Index to Plant-Names, Daydon-Jackson, 320.
Jahrbuch des K. K. botanischen Gartens, Eichler, 82.
Malesia, Beccari, 82, 319.
BOTANICAL WORKS NOTICED—
Pittonia, Greene, 426.
Plants of Australia, Müller, 163.
Plants of Oregon, Washington and Idaho, Howell, 319.
Primer of Botany, Hooker, 83.
Tennessee Flora, Gattinger, 426.
West Coast Botany, Rattan, 319.
BOTANY—Apetalæ, Macoun, 164; Balanophora and Thonningia, Fawcett, 82; Compass plant, 245; Crocus, Maw, 82; Cyperus, Britton, 83; Entomophilous flowers in Arctic regions, 318; Filicineæ, Burgess, 82; Flora of Washington, Knowlton, 82; Orchid nomenclature conference, 164; Pear-blight, Arthur, 82; Primula conference, 164; Protoplasm subjected to action of liquids, Goodale, 144; Ranunculus, Freyn, 83; Redwood Reserve, 425; Sympetaleia, Gray, 319; Wilmington Flora, Wood and McCarthy, 319. See further under GEOLOGY.
Boyden fund, 325.
Burnham, S. M., Precious Stones, 84.

C

Canada, Royal Society Transactions, 84.
CHEMISTRY—Alumina, phosphorescence of, 303, 304; Bismuth, valence of, 421; Carbon, absorption of gases by, 421; Carbon dioxide, refractive index of, 151; Chlorine gas, generation of, 419; Cyanogen, refractive index of, 151; Fluorine, production of, 236; Germanium, properties and constants of, 68; Hydrated salts, vapor-pressure of, 148; Hydrogen fluoride, etc., solidification of, 149; Metallic oxides, fluorescence of, 149; Phosphoric chloride, 422; Phosphorus pentafluoride, 305; Phosphorus tetroxide, 306; Potassium chlorate, decomposition of, 508; Silver, chloride, bromide, iodide, *Lea*, 349; protosalts of, *Lea*, 480, 489; Silicium phosphate, hydrated, 306; Silicon, influence on properties of iron and steel, 509; Silicocarbonate, artificial, 80; Soda cell, bichromate of, *Harding*, 61.
Chester, A. H., mineralogical notes, 284.
Chittenden, R. H., Studies from Laboratory of Physiol. Chemistry, 510.
Coast and Geodetic Survey, 1885 Report, 429

* This Index contains the general heads BOTANY, CHEMISTRY, GEOLOGY, MINERALS, OBITUARY, ROCKS, ZOOLOGY, and under each the titles of Articles referring thereto are mentioned.

Colton, R. P., Practical Zoology, 165.
Comets in 1886, 428; in 1887, 429; origin of, *Kirkwood*, 60.
Crosby, W. O., Geological Collections: Mineralogy, 318.
Cross, R. T., aquamarine from Colorado, 161.
Curves, isopycnic, 148.

D

Dana, J. D., on volcanic action, 102; Manual of Mineralogy and Lithology, 243; Taconic rocks and stratigraphy, 270, 393; changes in Mt. Loa craters, Hawaii, 433.
Day, D. T., Mineral resources of U. S., 317.
Daydon-Jackson, Index to Plant-Names, 320.
Diller, J. S., quartzose lava in northern California, 45; geology of northern California, 152.
Dodge, F. S., Kilauea after eruption of 1886, 98.
Draper, Henry, memorial, 429.

E

Earth currents, 307.
Earthquake, Charleston, 71; in Switzerland, 312; of Andalusia, 1884, 313; magnetic effect, 423.
Eclipse, 1887, in connection with electric telegraph, *Todd*, 226.
Eichler, A. W., Jahrbuch des K. K. botanischen Gartens, 82.
Electricity from condensation of vapor, 71; transmission of, 307.
Electrometers, aperiodic, 307.
Electromotive force of voltaic arc, 237.
Electrostatic and electromagnetic units, 152.
Emerson, J. S., Kilauea after eruption, 1886, 87.

F

Fewkes, J. W., new Rhizostomatous Medusa, 119.
Fossil, see GEOLOGY.

G

Galvanometer, new form of, 70.
Gattinger, A., Tennessee flora, 426.
Geological Annual, Agincourt, 159.
Geological Congress, International, 157, 511.
Geological map of United States, 77; of Berkshire, 393.
GEOLOGICAL REPORTS AND SURVEYS—Alabama, 78; Canada, 316; Minnesota, 159; New Jersey, 79; Western Texas, 73.
GEOLOGY—
California, northern, 152.
Coal, age of, *White*, 18.
Cross-timbers, Texas, geology of, *Hill*, 291.
Drift, Irish Esker, *Kinahan*, 276.
Eozoonal rock, Manhattan island, *Gratacap*, 374.
Faults of Southwest Virginia, *Stevenson*, 262.
GEOLOGY—
Faunas and floras, fossil, *White*, 364.
Fossil tree-trunk in hydromica schist, 158.
Ice period in Altai mountains, 165; of North America, 77.
Invertebrates of N. A. Jurassic, 79.
Mammals, American Jurassic, *Marsh*, 327.
Mountain limestones, Penn., 158.
Moraines, terminal, Maine, *Stone*, 378.
Paleocrinoidea, 154.
Paradoxides, Acadian, *Matthew*, 388, 390.
Taconic rocks and Stratigraphy, *Dana*, 270, 393.
Taconic system, *Walcott*, 153.
Gilbert, G. K., special processes of research, 452.
Glacier, the Muir, *Wright*, 1.
Glass, decomposition of, by carbonic acid, 68.
Goebel, K., Classification and Morphology of Plants, 427.
Goodale, G. L., living protoplasm subjected to action of liquids, 144.
Gratacap, L. P., eozoonal rock of Manhattan island, 374.
Gray, A., botanical notices, 80, 162, 244, 318, 425; botanical necrology, 164.
Greene, E. L., Pittonia, 426.

H

Harding, S. L., bichromate of soda cell, 61.
Heilprin, A., Distribution of Animals, 242.
Henry, Joseph, scientific writings of, 325.
Hidden, W. E., Mazapil meteoric iron, 221; contributions to mineralogy, 501.
Hill, R. T., geology of the Cross-timbers in northern Texas, 291.
Hitchcock, C. H., geol. map of U. States, 77.
Hooker, J., Primer of Botany, 83; Icones Plantarum, 163, 244, 318; Bentham's Handbook of British Flora, 319.
Howell, T., Plants of Oregon, etc., 319.
Huntington, O. W., Coahuila meteorites, 115.

I

Iddings, J. P., Lithophysæ and lamination of acid lavas, 36.
Iron, behavior of, under magnetic forces, 422; naturally reduced, *Tyrrell*, 73; nickeliferous metallic, Ulrich, 244; influence of silicon on properties, 509.

K

Kinahan, G. H., Irish Esker drift, 276.
Kirkwood, D., origin of comets, 60.
Kokscharow, N. von, Mineralogie Russlands, 424.
Kunz, G. F., meteoric iron, Augusta Co., Va., 58; Johnson Co., Arkansas, 494; Kentucky and Mexico, 228.

L

Laboratory, proposed N. England Marine Biological, 512; of Physiological Chemistry, New Haven, Studies from, 511.
Lakes, the great N. American, *Schermerhorn*, 278; Alpine, 431.
Lawson, A. C., geology of Rainy Lake region, 473.
Lea, M. C., red and purple chloride, bromide and iodide of silver, 349; photosalts of silver and latent photographic image, 480; photobromide and photoiodide of silver, 489.
Light, wave-length of, *Bell*, 167; *Rowland*, 182.
Lithophysæ, origin of, *Iddings*, 36.
Loew, E., Blumenbesuch von Insecten und Frielandpflanzen, 162.
Loomis, E., contributions to meteorology, 247.

M

McCalley, H., Warrior Coal Field, 78.
Marsh, O. C., American Jurassic mammals, 327.
Matthew, G. F., Acadian Paradoxides, 388; Paradoxides (Olenellus?) Kjerulfi, 390.
Metallic deposits by electrical discharges, 71.
Meteoric iron, Johnson Co., Arkansas, *Kunz*, 494; *Whitfield*, 500; Allen Co., Kentucky, *Whitfield*, 500; Carroll Co., Kentucky, *Kunz*, 228; Amherst Co., Virginia, *Kunz*, 58; Mazapil, Mexico, *Hidden*, 221; Coahuila, Mexico, *Huntington*, 115; Catorze, Mexico, *Kunz*, 228.
Meteorology, contributions to, *Loomis*, 247.
Meteors, form of area in the heavens, 325.
Minerals—Apatite, 160, 503; Aquamarine, Colorado, 161; Augite in rocks, *Van Hise*, 385; Awaruite, 244; Barite, hemimorphic crystals, 288; Beryl, 159, 505; Bismutite, 290; Brochantite, 287; Caracolite, 423; Celestite, pink, 286; Cerargyrite, pseudomorphs, 289; Cinnabar, natural solutions of, 199; Corundum, 507; Fuchsite, 284; Gold, natural solutions of, 199; Harstigite, 424; Hornblendes in rocks, *Van Hise*, 385; Kaliophilite, 423; Kaolin, action of, on alkali-chlorides, 419; Monazite, 160; Mursinskite, 424; Orthoclase, 243; Pectolite, 287; Phenacite, 130; Quartz, 507; Rutile, 161, 501; Schorlomite, 425; Schungite, 424; Scorodite, 290; Spodumene, 160; Stromeyerite, 79; Stüvenite, 80; Topaz, Mexico, 507; of Utah, 146; Tourmaline, 160; 506; Xenotime, 161; Zinkenite, 287.
Morphology, Journal of, 84.
Müller, von, Myoporineous Plants of Australia, 164.
Museum of Comp. Zoology, Bulletin, 165.

N

Newberry, J. S., N. America in ice period, 77.
New South Wales, Journal of R. Soc., 85.
Newton, H. A., astronomical notices, 428.
Nipher, F. E., Theory of Magnetic Measurements, 84.

O

Obituary—Eichler, A. W., 427; Hance, Henry Fletcher, 165; Harding, Selwyn L., 166; Hillebrand, Wm., 164; Lea, Isaac, 85; Morren, Edouard, 164; Newbould, Wm. W., 164; Oppolzer, Theodor von, 166; Orphanides, T. G., 165; Phillips, John Arthur, 326; Tolmie, W. F., 244; Tuckerman, Edward, 165; Wigand, J. W. Albert, 165; Youmans, E. L., 166.
Oliver, Treatise on Algebra, 325.

P

Patterson, H. N., Check-List of N. A. Plants, 244.
Pendulum, nearly perfect simple, 238.
Penfield, S. L., phenacite from Colorado, 130.
Photography by phosphorescence, 307.
Polarization by double image prisms, 237.
Poulton, E. B., gilded chrysalides, 321.

Q

Quicksilver pump, new, 151.

R

Rath, G. vom, North Carolina minerals, 159.
Rattan, V., West Coast Botany, 319.
Reade, T. M., Origin of Mountain ranges, 240.
Rocks—
- Crystalline, of Rainy Lake Region, 473.
- Eruptive Tertiary, granitic structure in, 315.
- Lavas, lamination of acid, *Iddings*, 36.
- Norites, near Peekskill, N. Y., *Williams*, 135, 191, 243.
- Quartzose basalt, Northern California, *Diller*, 45.
- Texture of massive, *Becker*, 50.

Rockwood, C. G., Charleston earthquake, 71.
Rowland, H. A., relative wave-length of lines of solar spectrum, 182; water battery, 147.
Russell, I. C., Geological History of Lake Lahontan, 242.

S

Schermerhorn, L. Y., physical characteristics of the Great Lakes, 278.
Schott, C. A., magnetic dip in N. America, 430.
Shaler, N. S., fluviatile swamps of New England, 210.
Sherman, O. T., atmosphere of β Lyræ, 126.

Smith, W. B., crystal beds of Topaz Butte, 134.
Soil, nitrifying organisms in, 420.
Spectral lines, distinction between solar and terrestrial, 70.
Spectroscope, new universal chemical, 67.
Spectrum, solar, relative wave-length in lines of, *Rowland*, 182.
Steel, behavior of under magnetic forces, 422; viscosity and temper of, *Barus* and *Strouhal*, 20, 308; effect of silicon in properties of, 509.
Stevenson, J. J., faults in southwest Virginia, 262.
Stone, G. H., terminal moraines in Maine, 378.
Storer, F. H., Agriculture, 432, 509.
Strouhal, V., viscosity and temper of steel, 20.
Sun, heat of, 423.
Swamps, fluviatile, New England, *Shaler*, 210.

T

Taschenberg, O., Bibliotheca Zoologica, II, 245.
Temper and viscosity of steel, *Barus* and *Strouhal*, 20.
Todd, D. P., observations of eclipse, 1887, in connection with electric telegraph, 226.
Topaz Butte, crystal beds of, *Smith*, 134.
Trowbridge, J., physical abstracts, 70, 151, 237, 307, 422.
Tyrrell, J. B., naturally reduced iron, 73.

U

Ulrich, G. H. F., metallic iron, New Zealand, 244.

V

Van Hise, C. R., enlargements of hornblendes and augites in rocks, 385.
Van Slyke, L. L., Kilauea after eruption of 1886, 95.
Volcanic action, *Dana*, 102
Volcanic glass changed to pumice, 76.
VOLCANO, Kilauea after eruption, 1886, Emerson, Van Slyke and Dodge, 87; Dana, 102, 239, 433.
Eruption of Mauna Loa, 310.
Eruption of Niua-fu, 311.
Vesuvius, relations of to Kilauea, *Dana*, 102.

W

Wachsmuth's Palæocrinoidea, review of, 154.
Walcott, C. D., Taconic System, 153; Cambrian Faunas of N. America, 158.
Washington, H. S., contributions to mineralogy, 501.
Water battery, *Rowland*, 147.
Water, freezing of aerated, 306.
Whale, fossil in Quebec, *Kalm*, 242.
Wheat-stone bridge, generalization of, 238.
White, C. A., age of coal in Rio Grande region, 18; relation of contemporaneous fossil faunas and floras, 364; review of Palæocrinoidea of Wachsmuth and Springer, 154.
Whitfield, J. E., analyses of meteoric irons, 500.
Williams, A., Jr., Mineral Resources of U. States, 317.
Williams, G. H., Modern Petrography, 79; norites near Peekskill, N. Y., 135, 191; orthoclase in norite, 243.
Wings of birds, movements of, 422.
Wright, G. F., Muir glacier, 1.

Z

ZOOLOGY—
Chrysalides, gilded, 321.
Medusa, rhizostomatous, New England, *Fewkes*, 119.
See further under GEOLOGY.
